

Grading Rubric – convert this a PDF after you fill out this form.

Validation		
	All pages validate – Free 2.5 Points – You do not have to HTML 5 validate However, you do have to validate your CSS for 2.5 points all css validates	5
	All pages display properly in all browsers pages are displayed properly	5
Design		
	Design principles (CRAP, color, layout etc) – Good Design COUNTS!	10
	Organization/Navigation – mobile friendly Navigation bar collapses down with a hamburger menu (used the w3schools example for the navigation bar)	4
	Corrections from the midterm project I don't think I needed to make any corrections	5
	Must Be Mobile Friendly – media queries – Responsive design Mostly mobile friendly	10
Technology		
	Original JavaScript Images on summer activities, winter activities and points of interests change to another picture when hovered over	8
	DHTML component Automatic slideshow of images on the index page	8
	Contact form; Comments saved to and pulled from database (insert and select)	12
	Form validation with JavaScript All forms are validated	10
	Form data validation and sanitization with PHP All forms get sanitized	10
	PHP includes on every page (header and footer). PHP is on every page	6
Extras – Note! The extras listed here are not all worth the same amount of		7

<i>points!</i>	
Additional effects/features from a JavaScript library – I want a slide show of pictures	
Site architecture <ul style="list-style-type: none"> • Single entry page to site • Page data stored in database • User authentication Sites are mostly all stored in the database	
Extensive, non-gratuitous use of CSS3 animations	
Spectacular design	
Favicon	
Surprise me!!	

Points Lost For:	
Missing or incomplete <i>about</i> page	
Repeated code	
Poor file structure	
Lack of comments in every file PHP, JavaScript, CSS and HTML	
Poor coding technique	
Using the traditional MySQL API (not using MySQLi)	
Not zipping files before submitting or not including URL to project on nova	
Using any libraries or frameworks (jQuery and Bootstrap! – except the grid layout in bootstrap. I will lecture in detail about this point.)	
Not providing the full link to this project on serenity.ist.rit.edu server in the comments sections of the drop box. Please link your URL top open in a new tab. (set the target) You must put this project in the folder required at the top of this problem description.
